

## Contents Vol. 5

### Issue 1

<b>Elke Wolf</b> , Power bounded composition operators in several variables	1
<b>Ajit Barman and U.C.De</b> , Semi-symmetric non-metric connections on Kenmotsu manifolds	13
<b>Sever Angel Popescu</b> , On a Laguerre's theorem	25
<b>Birsen Sağır and Nihan Güngör</b> , Continuity of superposition operators on double sequences spaces of Maddox $C_{r_0}(p)$	35
<b>Benharrat Belaïdi</b> , Differential polynomials generated by meromorphic solutions of $[p,q]$ order to complex linear differential equations	46
<b>Fatemeh Dehghani-Zadeh</b> , Cofiniteness and artinianness of generalized local cohomology modules	63
<b>Mircea Cimpoeaş</b> , On the Stanley depth of edge ideals of line and cyclic graphs	70
<b>Ileana Bucur</b> , On a generalized Gauss convergence criterion	76
<b>Amel Benaissa and Mouffak Benchohra</b> , Functional differential equations with state-dependent delay and random effects	84
<b>Harjit Singh</b> , Modeling of thermoelastic waves in rotating cylindrical panel by using Matrix Frobenius method	95

### Issue 2

<b>Guangjun Zhu</b> , Depth and Stanley depth of the edge ideals of some $m$ -line graphs and $m$ -cyclic graphs with a common vertex	118
<b>Ali Akbar and A. Sarkar</b> , Some results on a generalized sasakian-space-forms admitting trans-sasakian structure with a generalized Tanaka Webster Okumura connection	130
<b>M.H. Bijan-Zadeh and S. Ghaderi</b> , Finiteness properties of formal local homology modules	138
<b>Hèdi Elmonser</b> , $q$ -analogue of the Alzer's inequality	145
<b>Lucian Niță</b> , Fractal vector measures in the case of an uncountable iterated function system	151
<b>Yadollah Ordokhani and Haniye Dehestani</b> , Application of the Bessel-hybrid functions for the linear Fredholm-Volterra integro-differential equations	164
<b>A. K. Tripathy and R. R. Mohanta</b> , Oscillation properties of a class of second order neutral differential equations with piecewise constant arguments	178
<b>Rao Li</b> , On the upper bound of the energy of a connected graph	191
<b>Gauree Shanker and Deepti Choudhary</b> , On the $L$ -duality of a Finsler space with $(\alpha, \beta)$ - metric $(\alpha + \beta)^2/\alpha$	195
<b>Faouzi Haddouchi and Slimane Benaïcha</b> , Positive solutions of a nonlinear three-point eigenvalue problem with integral boundary conditions	202
